

This workbook has both a paper and a Jupyter notebook submission.

1. Exercise 6.9 Two-part submission:

- Paper: Before writing the code for this exercise, write your algorithm as pseudocode for part (b).
- Jupyter notebook submission for the rest of the problem.

2. Exercise 6.10

If you haven't taken quantum mechanics or modern physics, don't worry about the physical details. Just tackle this as a math problem.
