1. Exercise 9.10 (Just model the system. Don't break things into a), b), ... The method shown in class is a little different from the book.) Create figures of the string at t = 0., 0.002, 0.004, and 0.009 s

2. Exercise 9.13 (Just model the system. Don't break things into a), b), ... The method shown in class is a little different from the book.) Use $N = 2000$ points along the x-axis. Create figures looking at the probability density of the wavefunction $|\psi^2|$ at 1e-17, 4e-16, 8e-16, and 1.6e-15 seconds.
